Central High School
LEADING THE WAY FOR INNOVATION & CREATIVITY
Central High School: Leading the Way for Innovation and Creativity
Central High School has had a profound influence on me from my very first day of attendance. I arrived in September, 1945 when I was 13 years old and entering a whole new phase of life in which I alone was responsible for what I did. There were many questions swirling through my mind: “Who am I, what am I doing here and what is my purpose in life?” To me, these were all seemingly simple questions, but there were no simple answers.

On the first day of school we were called to the auditorium to hear from President Dr. William Cornog. He welcomed us and let us know what was expected of Central students. What I remembered most clearly about what he said was, “at Central, we enter to learn and go forth to serve.” At that moment, I had the answer to those questions and that is the mantra that has led me throughout my life.

It was what I experienced many years ago at Central that led to my decision to support the establishment of a state-of-the art Performing Arts Center. I was an aspiring violin soloist in the school orchestra and we played in an auditorium that did not possess the acoustical qualities, the sight lines, or other attributes of a concert hall. When the orchestra accompanied a performance of the opera H.M.S. Pinafore, I noticed how difficult it was for the performers and technicians. While it was a good performance it did not soar to the level of what could happen inside a legitimate performance hall.

That experience stayed in the dark recesses of my mind until many years later when I heard that former Central President Dr. Sheldon Pavel had said that what he would most like to have at Central would be a separate performing arts building. That caused me to recall my past experience and stimulated my desire to do something about it. While my hope is now on the drawing board and is being supported by a gift of $8.1 million from the School District of Philadelphia to remedy the school’s existing and anticipated infrastructure problems, it will require the largesse and dedication of many other Central graduates to make it a reality.

I know that many Central High School graduates look back fondly on their years at Central and realize how it helped to prepare them for further education and then for business or professional careers. My hope is that many of those loyal graduates of Central will choose to give back to Central to help fulfill the dream. In so doing they will not only be building a Performing Arts Center but will be providing thousands of feet of vacated space for various new STEM projects. In order to encourage such alumni contributions, I have agreed to arrange for them to be matched dollar for dollar up to a total of ten million dollars.

**Joseph Field, 192**  
Central alumnus  
Founder and Chairman-Emeritus of Entercom Communications Corp.
Central High School:
Leading the Way for Innovation and Creativity
Attending Central High School was a life changing experience for you when you walked the halls of "Dear Old High". It is the same today for our current students. We offer a rigorous academic program with the goal of preparing our students to be the leaders of their generation. Their drive for excellence is inspiring. As we look forward to the ever changing landscape of education, we recognize the need for new funds so that we can evolve and continue to offer the best educational experience for students in Philadelphia.

I am so proud to lead the most historic high school in Philadelphia. Our current students continue to thrive in all aspects of our academic, athletic, music and art programs despite lacking the resources of our suburban counterparts. The commitment of our school community is focused on the successful development of the young scholars we serve. As we embark on this historic campaign, I ask you to remember your Central experience and support the students of tomorrow.

LEADING THE WAY FOR INNOVATION AND CREATIVITY will enable us to renovate and create the world class facilities that our students deserve. The current state of educational funding in our commonwealth has led us to this place. We recognize that this is not the normal path that a public high school traditionally travels but we know that there is nothing traditional about our school. We are the elite, public college preparatory high school in Philadelphia. It is time for us to rally and support Central High School so that we can continue to change the lives of the gifted young people in our great city.

Timothy J. McKenna  
14th President of Central High School

For 180 years and 275 graduating classes, Central High School has proven to be an educational leader in Philadelphia and nationwide. It is known for its singular focus: admitting students with a passion for learning and providing them with a rigorous experience, in and out of the classroom, that helps them excel at college and in life. With 2,450 students from every zipcode in the city, Central is educating a broad racial, ethnic, and economic group, earning Central recognition as the most diverse public high school in the country.
EDUCATIONAL MISSION

OUR MISSION

As a college preparatory public school, Central High challenges students with rigorous academic programs to prepare them for the demands of higher education. Building upon the diversity in our school, we aim to prepare students to contribute and thrive in a heterogeneous world. We enable students to develop problem solving skills, a life-long passion for learning, and aspirations to be thoughtful leaders of their generation.

OUR BELIEFS

The diversity of our student body is a precious asset; the inclusion and engagement of all community members is essential to our collective success.

Our essential purpose is to foster the highest level of academic achievement for each student.

Students thrive when provided with the necessary intellectual and emotional supports to meet the challenges of a total learning community.

Students learn best when their curiosity is stimulated, and they are encouraged to take intellectual risks.

The availability of robust and inclusive extra-curricular programs are essential to the positive overall experience of the school.

Service is critical to the development of students’ character and sense of civic responsibility.

Central, as an institution, is committed to the same process of self-exploration that it cultivates in its students.

Central strives to build a cohesive, mutually supportive, academic community to serve as a model for the community at large.

Central’s rigorous academic standards, coupled with the intellect of my classmates, set benchmarks for success. I honestly can say that my time at Central provided me with exceptional preparation for the future.

Central High School: Leading the Way for Innovation and Creativity
Chartered in 1836, Central High School is the 2nd oldest public high school in the country. Originally located in Center City Philadelphia across from City Hall at the site of the former Wanamaker Store, Central’s first class included 63 students. Central was the first public high school established in Pennsylvania, and the first one founded beyond New England.

Central High School developed as an institution of great importance in the annals of American education. An Act of Assembly granted Central the authority to confer degrees in 1849, just as the University of Pennsylvania possessed.

Over the course of 180 years, Central has continued to grow in size, academic programs and extracurricular activities. The school has moved to three additional locations during this time, always driven by pedagogical needs and buildings best suited to its expanding programs. In 1939, soon after the school celebrated its centennial, Central opened the doors of its current building, one of the last schools constructed in Philadelphia prior to the start of World War II. Select additions and renovations have been completed in the last 40 years when needed funding has been available from the Philadelphia School District or by private donations.

As Central’s curricular goals again drive a need for new space to accommodate our expanding programs in arts and technology, we are fortunate that our National Historic Registered building is positioned on a campus with ample space available to accommodate further additions. Whereas the initial three building relocations in 1838, 1854 and 1900 occurred approximately every 50 years when the buildings were in need of major renewal, Central’s current building at 78 years old is considerably past due for facilities renewal.

“...The addition of young women to Central High School immeasurably enhanced the diversity of the student body at the school. I would not have made this gift to the school had young women not been admitted to Central.”

Gene Rotberg '88
Central High School is the largest public college preparatory high school in Philadelphia. To understand how our performance, diversity and funding metrics compare, we look to our peer urban exam-based schools in Boston and New York City, as well as a neighboring suburban public school Lower Merion High School. Central has been rated the most diverse high school in the nation by Niche.com while maintaining our high academic, athletic and public service achievements. When viewed amongst our peers, we are making these great achievements with the least funding and the most economically disadvantaged students.

School funding formulas vary, with Philadelphia consistently having less funding than many other major urban school districts. A 2015 Pew Charitable Trust study on school funding in Philadelphia shows that the Philadelphia School District budget distributes on average 67% less per student than Boston, and 78% less than New York City. In addition, both Boston Latin and Stuyvesant have supplemental funding from private donations and endowment enabling them to provide the level of education, counseling, facilities and operations needed for success. Lower Merion school district provides 80% more in funding per student than Philadelphia, and they too pursue private sources to fund additional initiatives.

While it’s true that the ‘best schools’ lists vary, it is interesting that there is so much accord among experts as to what sets the frequently mentioned schools—Stuyvesant, Boston Latin, Central High School in Philadelphia—apart. And above.

Life Magazine
Among its peers, Central receives the lowest dollars per student, mostly from public funding. Lower Merion receives the highest dollar amount per student, at almost twice the funding for Central students. Boston Latin and Stuyvesant are mid-range, but with a mix of public and private sector funding.

**FUNDING**

- **Central High School**: $26,812/student (100% public, private funding N/A)
- **Lower Merion**: $12,676/student (99% public, 1% private)
- **Boston Latin**: $20,926/student (89% public, 11% private)
- **Stuyvesant**: $16,115/student (95% public, 5% private)

**URBAN PUBLIC SCHOOL DISTRICT FUNDING:**
- Boston - $18,626
- New York - $16,035
- Philadelphia - $12,570

Source: Pew Charitable Trust 2015 Study titled “A School Funding Formula for Philadelphia”

**ECONOMICALLY DISADVANTAGED**

- **Central**: 63.7%
- **Stuyvesant**: 45.0%
- **Boston Latin**: 33.3%
- **Lower Merion**: 10.0%

Data from each school website sites the percentage of students that are considered economically disadvantaged qualifying for free lunch programs.

**ACHIEVEMENT**

Achievement is measured by % of graduating students matriculating to college

Central’s achievements are the collective success of our students, faculty, administrators, and staff for their work together in the classroom and in the community. We foster and promote rigorous academic achievement with a record number of students taking Advanced Placement and International Baccalaureate courses. Our faculty of scholars embraces education and encourages curiosity and risk taking. We continue to be recognized for our achievements at local, state and national levels. And our students leave Central eager to continue their studies at colleges and universities that are awarding them scholarships, awards and prizes that recognize their accomplishments and help pave the way for their future successes.
Our Challenges

This proposed phase of improvements builds on the foundation of a comprehensive masterplan completed in 2016 and focuses on developing new educational spaces that support Central’s academic mission while also addressing significant deferred campus maintenance and improvements.

1. Aging campus site conditions and building deferred maintenance require immediate attention
2. Built on a hill, campus spaces are disconnected and parking is not accessible
3. Rehearsal rooms for the arts are undersized and insufficient
4. Underutilized spaces are missed opportunities
5. A lack of student common spaces inhibits learning outside of the classroom
6. STEM and project-based learning spaces are severely lacking
7. Classrooms within academic divisions are dispersed
8. No accommodations for deliveries and trash removal necessitate dual use of the main entry
9. Vehicular driveways are narrow and unsafe

What does Central Alumni mean to you? For me it means a shared, life changing experience. Now we have an opportunity to show our appreciation by supporting Central students of today and tomorrow.

Dick Prinz 212

In my 50 years working with the Alumni Association, I often hear members of the Alumni say, ‘I have a deeper feeling for Central High than my college or graduate school.’ Now is the time to show your gratitude for everything Central has meant to you.

Chuck Steinberg 221
Central High School: Leading the Way for Innovation and Creativity
Central High School is one of the premier public college preparatory schools in the nation.

Our recent graduating class (275) was presented with over $22 million in scholarships, prizes and awards, which confirms the successes of our prior capital investments in the Barnwell Library, Gymnasium Addition and Auditorium Renovation. This motivates us to continue to enhance our facilities with improvements leading the way for innovation and creativity.

**Repair and Invigorate the Campus**
Central’s 25-acre campus and its 200,000sf 1939 historic academic building is the 4th campus for Central since its founding in 1836. It’s time to invest in our “Dear Old High” facilities and grounds, be stewards of our past, and continue and expand our legacy forward.

**Academic Planning**
Comprehensive academic planning fits near term initiatives within the long term pedagogical vision for Central.

**Integrate STEM Education**
Building on the success and entrepreneurial spirit of Centrals’ world championship robotics program, the new STEM Innovation Center will allow collaboration and project-based learning to take place across Science, Technology, Engineering and Math disciplines.

**Provide 21st Century Learning Opportunities**
Many of our top performing students need access to computers and new technology that are necessary in today’s learning environments. The new Digital Media and Technology Center housed in the new Student Commons, will provide technology for classroom research and writing projects, podcasts, and broadcasting.

**Advance the Performing Arts**
The arts are flourishing at Central High School, with 41% of students participating in music, theatre, dance and visual arts through coursework, ensembles and extracurricular clubs. Purpose-built space for the arts will illustrate our belief that arts education is an integral pedagogical component that is proven to foster high academic achievements.
REPAIR & INVIGORATE THE CAMPUS

The campus grounds, in a current state of neglect, are envisioned to be repaired and invigorated with life. A new sense of arrival is created through site development and placement of the new Performing Arts Center. The campus vehicular entry is moved away from the busy traffic intersection of Olney and Ogontz Avenues and will be wider and safer for incoming and outgoing traffic. The parking lot is reconstructed at a lower elevation allowing for the removal of deteriorating retaining walls and narrow driveways that are unsafe and divide the campus. Rather than a stark blank asphalt lot, the new parking lot will be infused with sustainable infrastructure to manage stormwater, offer shade, and provide for handicap accessible parking.

A site for a new Performing Arts Center is chosen between the pedestrian and vehicular entries at the north lawn creating a shared entry courtyard and outdoor commons to the school. The historic main entry of the school is retained and remains prominent. Outdoor spaces that are useful to academic, social, athletic, and operational needs are incorporated, including outdoor STEM classrooms and an area designated for loading and deliveries.

The memorable South Lawn is preserved as a quiet space for future campus development of athletic, academic and social spaces.
Phase 1
1 Performing Arts Center

6 Entry Plaza
7 Outdoor STEM Classroom
8 Deliveries and Trash
9 Student Commons
10 STEM Center

Master Plan Improvements
A Senior Patio
B Patio Extensions
C Tennis Courts
D Recreation Courtyard
E Main Building Entry
The Campus and Facilities Masterplan evaluated the needs of the school and envisioned a new Performing Arts Center to appropriately house rehearsal and performance spaces in taller, acoustically tuned rooms. With spaces for music housed in a new structure connected to the main building, we are able to reallocate spaces in the main building to consolidate academic departments and add new spaces for STEM and Digital Media and Technology Center within a centralized Student Commons that will bridge the arts and academics.
Building upon the strength of the science and math curricula at Central, Robotics has been the fastest growing extracurricular club in recent years. In 2016, 100 students brought Central’s nationally ranked RoboLancers to the FIRST World Championship for the 2nd year in a row. The RoboLancers illustrate the potential and strength of interdisciplinary collaborative projects in Science, Technology, Engineering and Math (STEM) at Central. Of the eleven 2016 graduating RoboLancers, ten are studying engineering or science in college and the eleventh is studying international business.

Making use of an underutilized space in the lower level of the Main Building, The STEM Center will be home to robotics after school and will host interdisciplinary class work and research throughout the academic day.

The Maker Space and Robotics Studio will allow Central’s three Robotics teams to work in dedicated space with a robotic field and ample room for planning and construction. The Maker Space is a workshop outfitted with 3D printers, CNC-milling machines, laser cutters, tool benches and other breakout spaces for group work. The Flex Lab and Research Studio includes wet lab facilities for research and hands-on engagement with associated spaces for computer work and group research. These spaces are supported by a Metals workshop, a STEM classroom and an outdoor project-based learning space with amphitheatre seating built into a hillside.
The RoboLancers robotics team gives students an experience which our industry mentors find eerily similar to their work as professional engineers. The students design, build, and test complex machines on tight timelines; they secure funding and manage an annual budget of $100,000; they write and speak about their work to judges, sponsors, politicians, and the press; they are good community partners, supporting hundreds of students in schools and programs around Philadelphia; and they build strong professional relationships with each other, earning trust and respect as they lead their peers and hold each other accountable for excellent work.

Michael Johnson
Science and Robotics Team Faculty
The social hub of Central High School is the main hallway, or “street” that on every floor fills to capacity with students between classes. Students have a free period during the day when they need places to study, collaborate, prepare for tests and complete their work. Many students do not have access to technology and appropriate study environments that are needed to excel when they are not at school. Beyond the library, which is used by classes and can seat just 1/3 of the students during their free period, no other space is available besides the “street” where you will see students sitting on the floor trying to work.

The new Performing Arts Center connects to the main building at the 2nd floor. The north wing transforms into a Student Commons anchored by a new Digital Media and Technology Center providing computer labs for research, green screen rooms, voice over rooms and a broadcast room, all allowing integration of media and technology into Central’s curricula.

The Student Commons is the hub of student life centrally positioned vertically and horizontally in the building. Group study rooms and collaboration areas encourage interdisciplinary project-based learning through collegiate level study environments.
ADVANCE THE PERFORMING ARTS

A new Performing Arts Center provides purpose-built space for the performing arts at Central housing rehearsal and performance spaces for Central’s 11 large performing ensembles, 5 chamber music ensembles and academic courses in history, multi-culturalism, music theory, and music technology.

A performance venue seating 400 people will accommodate music performances of all sizes, theatrical and dance performances, as well as musical theatre and extracurricular club performances. Instrumental and choral rehearsal rooms will be scaled to fit the size and acoustical needs of large ensembles. Individual and ensemble practice rooms will allow for break-out rehearsals and practice times before, during and after school. A scene shop and dressing rooms will support the venue and allow for outside groups to perform at the school.
The Student Commons extends from the hallway of the Main Building into the lobby of the Performing Arts Center creating a dynamic and engaging lobby and entry sequence.
Featured as a Grammy Signature School, Central’s ensembles have performed all over the world including trips to Austria, England, Israel and Hungary. Every spring, the Music and Art Departments present a full-scale musical theater production. Our recent performances were *Seussical*, *Oklahoma*, *Aida*, *Hairspray*, *West Side Story* and *Annie Get Your Gun*. 400 students participated as cast, musicians, stage crew, design, marketing, set design and construction, costume design and more.

The performance venue can accommodate various music ensembles, as well as theatre and dance productions. The balcony level connects to the 2nd floor of the main building and is connected to the main floor with open circulating stairways.
Serving as the Central High School Music Department Chair is an extreme pleasure, honor, and adventure of a lifetime. Our music students are some of the finest young musicians and scholars in the city of Philadelphia. Their compassion, dedication and intense work ethic inspires our faculty. The department is flourishing as a model of academic achievement, artistic excellence and civility. I look forward to a brilliant future for the arts at Central.

Benjamin E. Blazer
Music Department Chair
I’m excited for this new building because it will give the future students the chance to feel the same joy that I have felt while being a part of the arts program.

Dylan, 277

We have outgrown the close confines of small spaces devoted to the arts... this Performing Arts Center will provide us with new and exciting experiences to flourish.

Grace, 277
Central High School: Leading the Way for Innovation and Creativity
Our masterplan envisions the capital improvements of this campaign being completed within the next decade, and other long term masterplan initiatives such as department reconfigurations, athletic renovations, infrastructure improvements and additional site development incrementally as funds become available.

Campaign project costs are based on 2016 estimates.
YOUR ROLE IN THE CAMPAIGN...

Due to Central, I was the first in my family to attend college. In one generation the educational and economic trajectory of my family has changed for the better.

Nicole Gaughan VanBuskirk 257

Central opened my eyes to the world.

Pete Forjohn 235

I have a wall full of awards and the one that everyone notices is my Central High diploma.

Mike Franchetti 255

The musical tutelage I received laid the foundation for my own musical career.

Dr. Donald Stoltz 200

Central is the most significant institution that affected the course of my life.

Bernard G. Spain 198

I am who I am because of Central.

David Kahn 220

Every alum has their own reasons—but all say that attending Central High School changed their life more than any other place or event. Our ability to continue to educate and inspire future leaders, engineers, artists and innovators converges with three major streams of operational excellences:

1. Spaces for learning that propel our mission for future generations
2. A well-steward ed campus and grounds
3. Strong private funding sources that build upon the foundation of our public resources

Join us in leading the way for innovation and creativity and extend the great legacy of Central High School for generations to come.
...HELP US CONTINUE TO CHANGE LIVES
THE TIME IS NOW

Central High School has had a profound influence on me from my very first day of attendance. It’s one of the greatest thrills of my life to be able to contribute to Central.

Joseph Field, 192

There has never been a more critical moment to invest in the future of Central High School. Philadelphia needs more of all that we foster—engaged students, invested faculty, rigor and academic excellence, commitment to community service, and social good.

LEADING THE WAY FOR INNOVATION AND CREATIVITY supports our mission to provide a transformative educational experience for our students and create a lasting legacy of excellence.

With your help we can repair and invigorate the campus, deliver academic richness, advance the performing arts, provide 21st century learning opportunities, integrate STEM education and create a Central Fund for the Future.

...Let us tell you more about the man who has the vision to dramatically change the educational landscape for future generations of students at Central High School, and initiated this project.

Central alumnus Joseph Field (192) is the Founder and Chairman-Emeritus of Entercom Communications Corp., the second largest radio broadcasting company in the United States, and a local philanthropist who supports arts and music programs throughout the Philadelphia region. Mr. Field graduated from Central in 1949, and went on to study at the University of Pennsylvania and the Yale Law School, but never forgot the sound and sight limitations of Central’s auditorium when he performed there as a violin soloist and member of Central’s orchestra. Eager to give back to the school that played an integral role in molding the successful lawyer and businessman that he would become, Mr. Field approached the Associated Alumni of Central High School and offered a $10 million gift (in the form of a matching grant) for construction of a Performing Arts Center on Central’s campus. The School District of Philadelphia has made a significant initial investment in the project for physical and structural improvements and hundreds of Mr. Field’s fellow Central alumni have also contributed to the ongoing capital campaign.

The time is now for you to help lead the way, consider your support and follow this visionary who is blazing a path for future generations of Central High School students!
We are grateful to the many people who have helped to create this vision of innovation and creativity for Central High School. Support for our efforts comes from the commitment of our Associated Alumni Board of Managers, our President Timothy J. McKenna, our Home and School Association, The School District of Philadelphia, and from our many friends in the community who share our passion for education.
